

Lead DevOps & Cloud Architect (f/m/d)

Committed, dynamic and with a passion for precision, we revolutionise the world of measurement and survey.

Around the globe, our customers use our smart technologies, and save and edit their data in real-time. You create the software solutions for our high-end products skillfully and enthusiastically from concept phase all the way to design and implementation. Join our team and make your visions come true!

This appeals to you

- Design and implement the cloud architecture of a modern web platform, including background services
- Responsible for the overall cloud architecture and technology stack
- Being responsible for designing and implementing a DevOps environment and Cloud Architecture
- Define processes for service operation (monitoring, failure handling, ...)
- Drive technical concepts and decisions
- Setup and maintain the CI/CD pipeline and other automated processes

This is you

- You are passionate about technology, even in your free-time
- At least three years of experience with cloud infrastructure (AWS or Azure) is essential
- Experience with cloud architecture (design patterns) and services (IAM, IoT hub, device provisioning, CDN and more)
- Experience working with virtualization, containers and tools for container orchestration is a must
- You are fluent in one or more scripting languages (e.g. Bash, Python, Powershell). Higher level languages are a plus (e.g. C++, C#)

- You have first experience in being the Techlead and no hesitance in making decisions
- You are fluent in English (spoken and written), good spoken German is a plus

About Us

Our innovative solutions and products are characterised by the highest efficiency and reliability. Help us to improve the future, become part of our team and a global success story.
