

C++ Software Engineer (f/m/d)

Committed, dynamic and with a passion for precision, we revolutionise the world of measurement and survey.

Around the globe, our customers use our smart technologies, and save and edit their data in real-time. You create the software solutions for our high-end products skillfully and enthusiastically from concept phase all the way to design and implementation. Join our team and make your visions come true!

This appeals to you

- Contributing to our high quality solutions by writing quality code, supporting automated tests and documenting the embedded software
- Working on a complex application with interest in object-oriented programming, Embedded systems and Web technologies
- Conceptualizing, designing and implementing embedded software solutions for our high-end reference station systems
- Close collaboration with surveying application engineers, product management and support team
- Working together in interdisciplinary agile software development teams with a focus on: <https://leica-geosystems.com/products/gnss-reference-networks>

This is you

- University degree in Computer Science or relevant education
- Professional experience in object-oriented software development in C/C++ (BOOST, STL)
- Experience in application and/or embedded BSP development on embedded Linux platforms
- Experience in being part of an agile environment (SCRUM)

- Preferably knowledge in web development (HTML, CSS, JavaScript)
- Team player in an international and interdisciplinary environment
- Fluency in English is a must / German beneficial

About Us

Our innovative solutions and products are characterised by the highest efficiency and reliability. Help us to improve the future, become part of our team and a global success story.

How can I apply

If you are interested in this challenging and varied position, then we look forward to receiving your online application! Due to the privacy policy, we accept applications only via the application form.
